

OJABIO Influenza A & B + SARS CoV-2 Antigen – Rapid Test Kit

OJABIO

COVID-19 is raging around the world and has caused over 15 million infections and more than 630,000 deaths. The R&D Team of OJA and the Eye Optometry Hospital affiliated to Wenzhou Medical University, with the support of the major research projects of the Zhejiang Science and Technology Department and the Wenzhou Science and Technology Bureau, has developed two detection kits for the SARS-CoV-2 Virus and the Influenza A & B Virus.

Ojabio Influenza A & B + SARS-CoV-2 Antigen - Rapid Test Kit can realize one time detection of three kinds of viruses, which can be used for rapid triage of clinical and testing people and guard against the superimposed effect of seasonal influenza while fighting against the deadly COVID-19's epidemic situation.

PRODUCT FEATURES

- **Simplicity** - Extremely easy to use and simple to interpret results.
- **Fast** - Results within 2 to 15 minutes.
- **Lag time** - Unlike other testing, there is no need to wait 7-12 days for a test. The virus is detectable within 24 hours of infection.
- **Comfort** - No use of the invasive and uncomfortable Nasal Swab method.
